The case for change

Automating for a sustainable future – How ports can benefit from automation

Dr. Yvo Saanen, Managing Director, Portwise

Portwise is a TBA Consultancy B.V. brand

Should we automate?

The 4 pillars of the terminal automation business case

ENVIRONMENT

OPERATIONS

FINANCIALS

SAFETY

What is the driver to consider automation?

Capacity Constraints

Cost-efficiency

Eco Performance

COMPETITION?

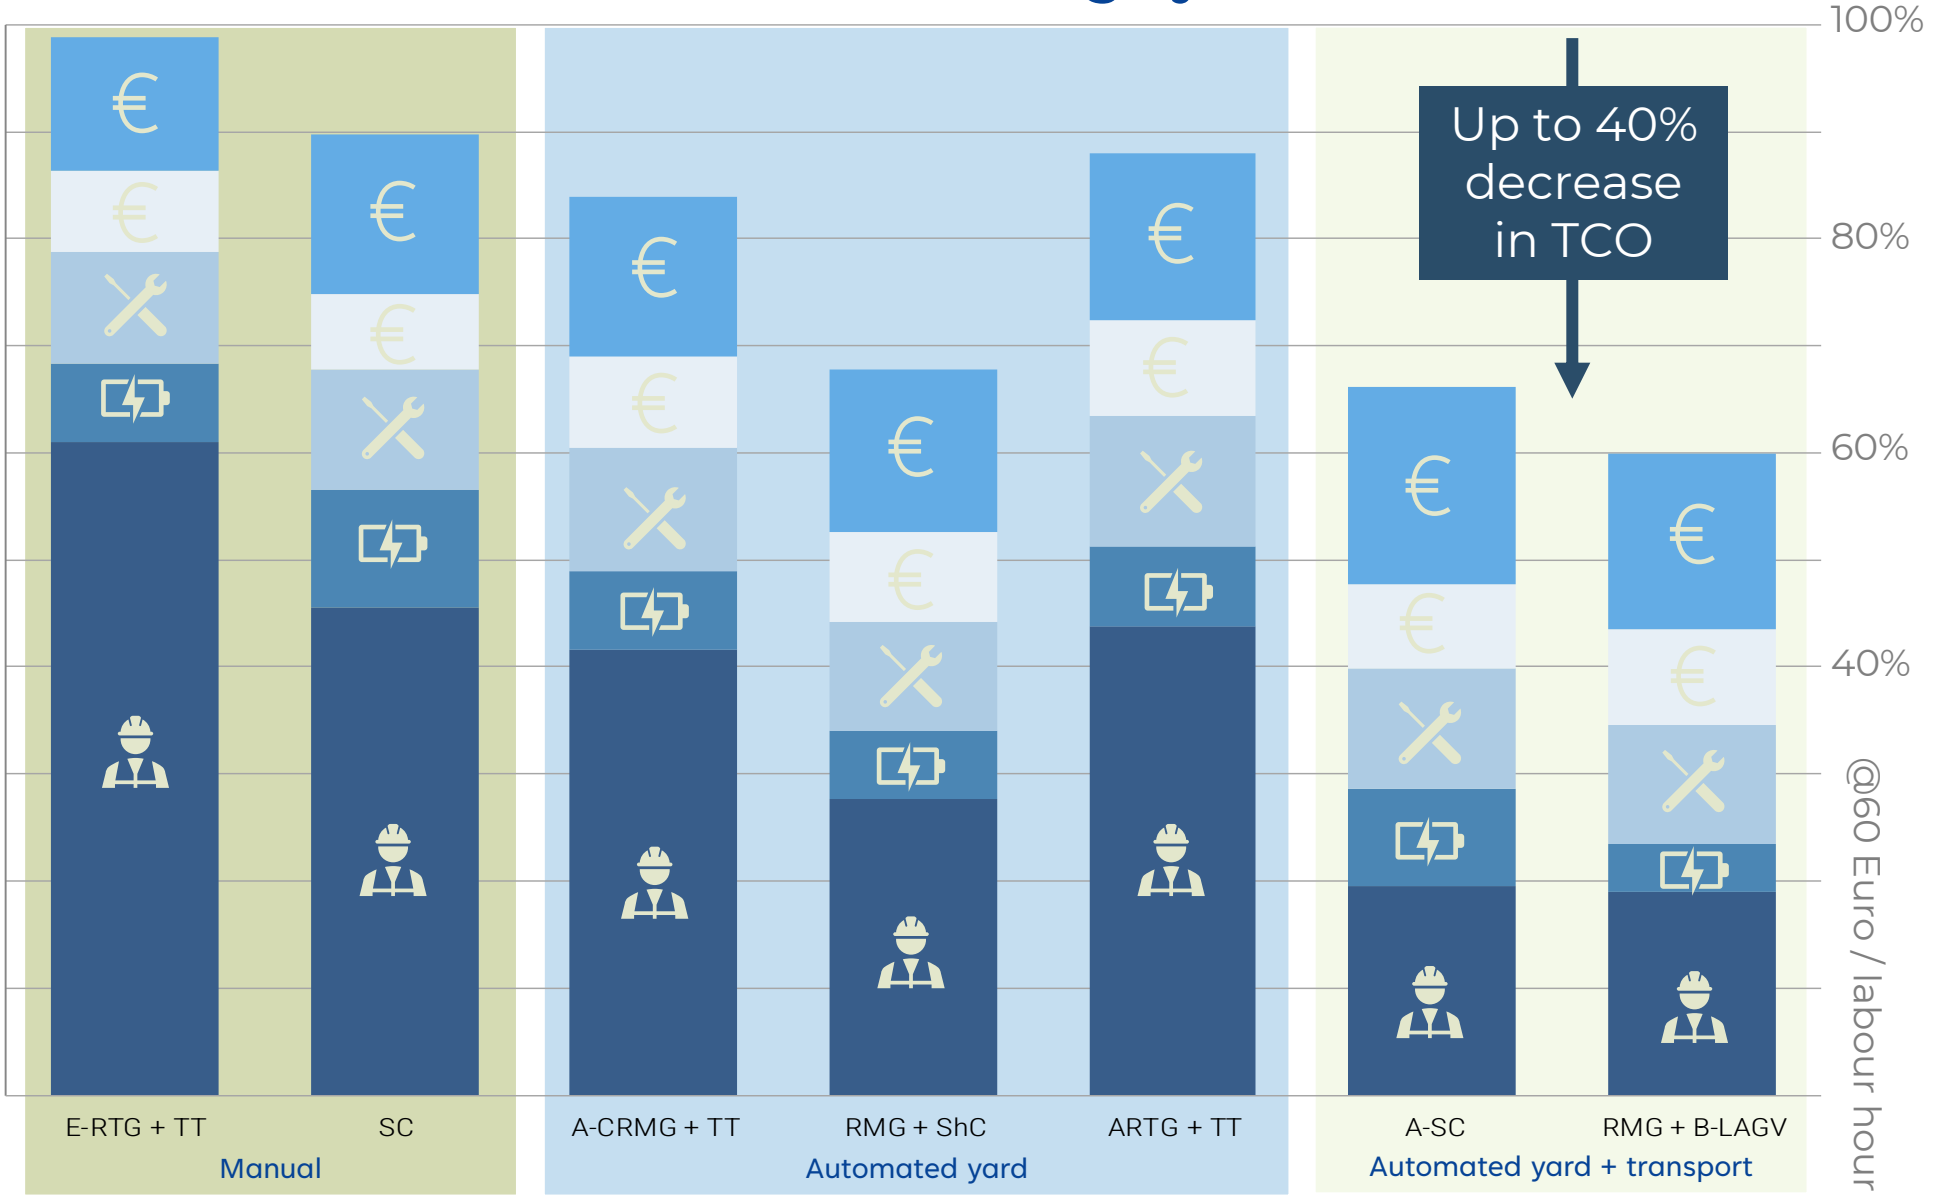

Increasing yard capacity:
Up to
180%
increase

Density of stacking systems (based on net container yard)	Footprint (NCY)	Peak stack capacity (TEU / ha)	Increase compared to Straddle (1 over 2)
Wheeled operation	250 TGS/ha	238 TEU/ha	-53%
Reach Stacker, block 3-wide/3-high	258 TGS/ha	464 TEU/ha	-8%
Straddle Carrier 3-high (1over2)	265 TGS/ha	504 TEU/ha	0%
Straddle Carrier 3-high (1over3)	265 TGS/ha	716 TEU/ha	42%
RTG 7-wide (1 over 5)	311 TGS/ha	1,011 TEU/ha	101%
CRMG 12-wide (1 over 5)	291 TGS/ha	1,164 TEU/ha	131%
(A)RMG 9-wide (1 over 5)	330 TGS/ha	1,403 TEU/ha	179%

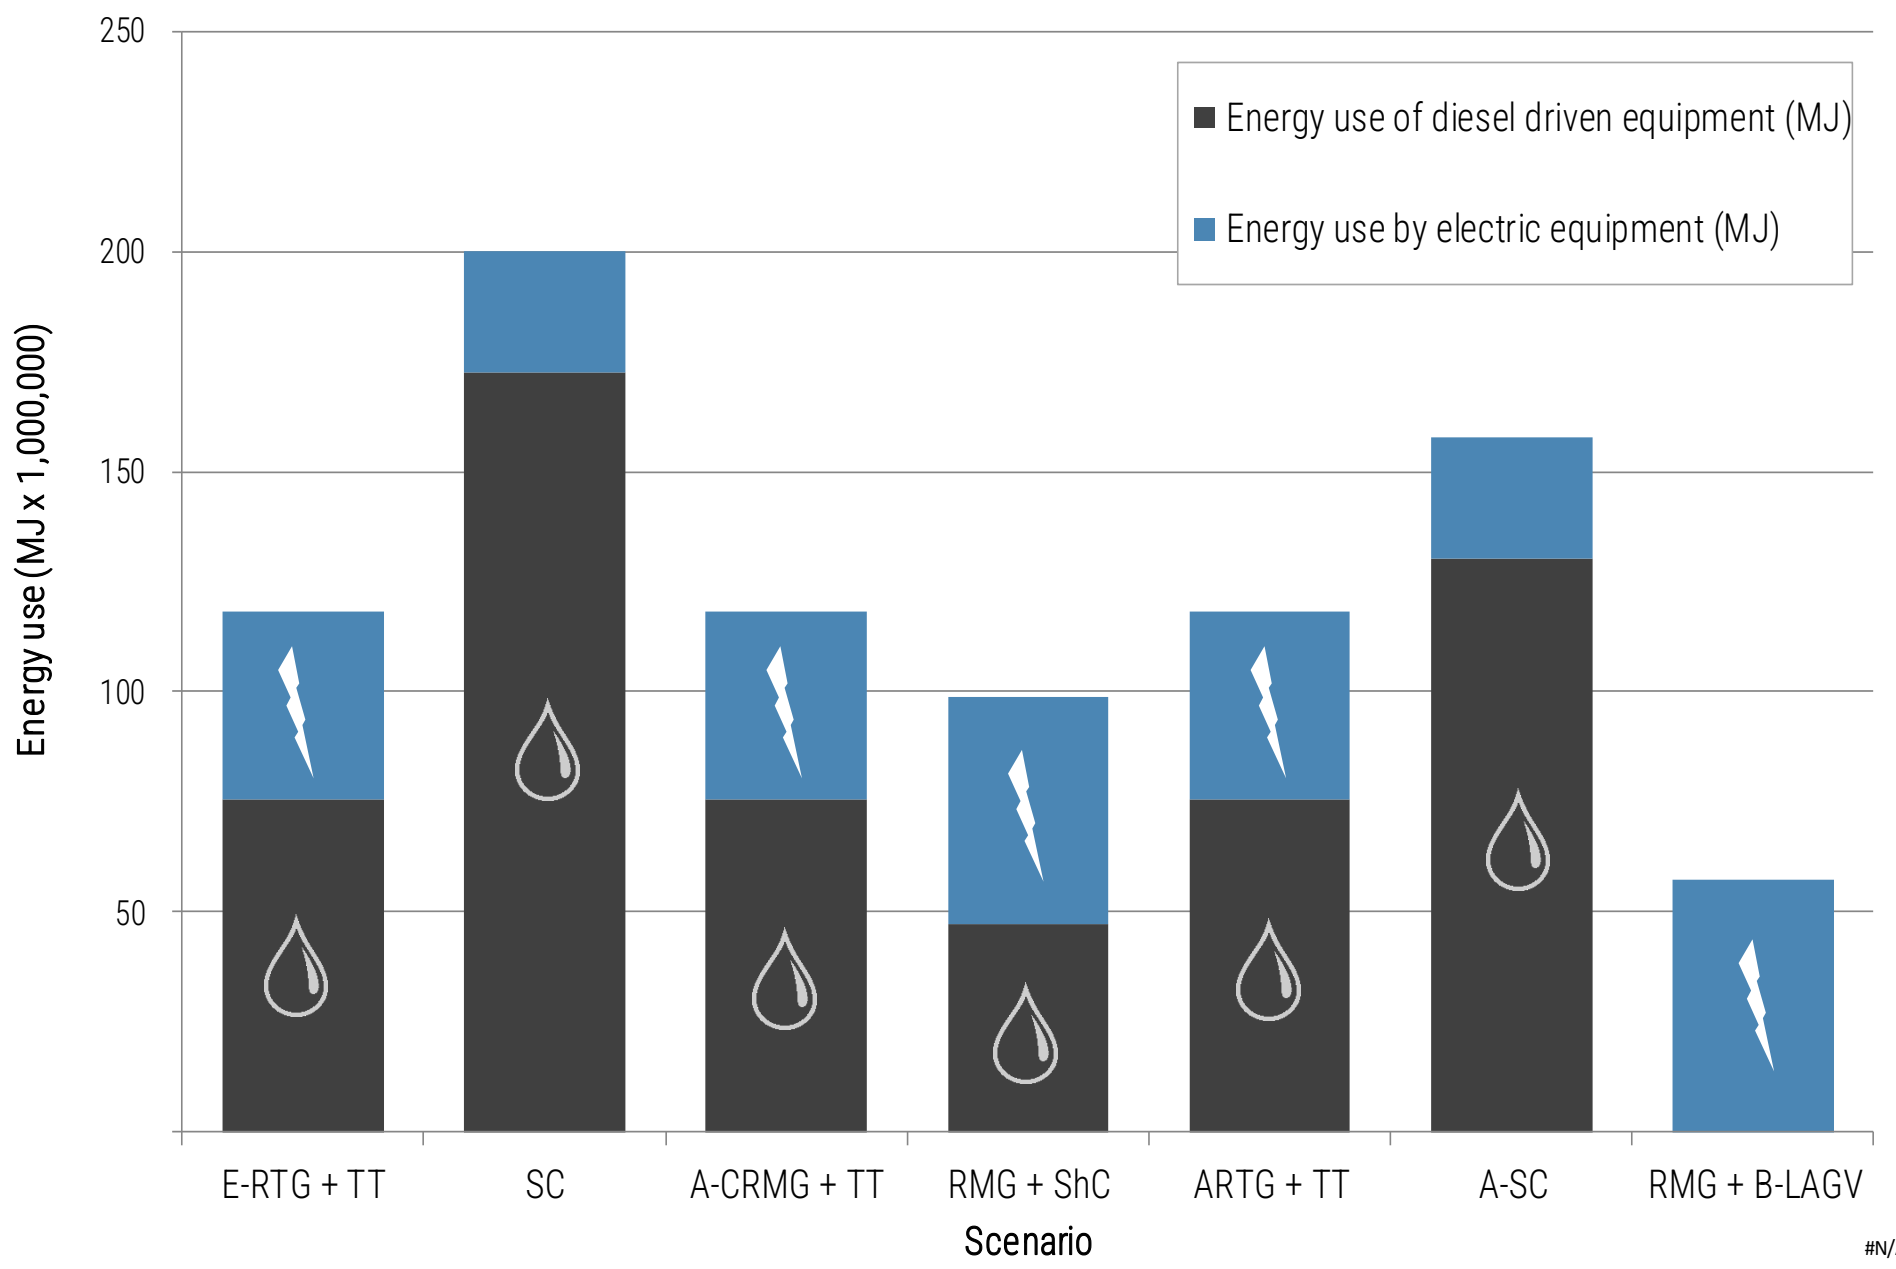

Increase in Cost efficiency:
TCO reduction up to 40%
Payback within 3-5 years

TCO of handling systems

- Depreciation cost per container
- Capital cost per container
- Maintenance cost per container
- Energy / fuel cost per container
- Labour cost per container

Improvement of
Eco efficiency
Up to 60%
reduction of
energy use

Current state of affairs

- Small percentage of container terminals (<5%) have a degree of automation
- Most automated terminals are large (>2M TEU), but there are several below 1M TEU:
 - Patrick's & DPWorld Brisbane (~500KTEU)
- Many terminals are considering automation
 - Green-field in developed areas → high likeliness
 - Brown-field → gradual introduction of more automation technology
- Although the supplier base is increasing.....
 - there is little standardization
 -integration remains cumbersome
 -projects are ALL delayed

What are key lessons learnt from automation projects

- Bridge & balance the silos (civil – equipment – IT)
- Automation is still run by people: include them
- Integration remains a major challenge
- Simplicity over complexity
- Exceptions are the norm, treat them alike

Thank you!
